PLANT GROW LIGHTS - www.antlux.com

I've never seen a grow spot of that low a wattage....are you trying to use LED household bulbs? If so, they help nothing, really. If they ARE "50 true watts", then their PAR bandwidth production and light intensity (at proper heights) is about the equivalent of half a 250 watt HID, or (between changed footprint and ability to get better penetration) about "300 watts" of CFL...to the individual plant it can hit well.

Can I grow weed with 50w led lights? | Grasscity Forums ...

Lower-powered lights such as a 250 watt LED grow light should be kept 12-24 inches above the top of the canopy. Mid-range lights such as a 600 watt or 900 watt LED grow light should be 14-36 inches from the top of your plants. High-powered lights such as a 1500 watt, 2000 watt or 3000 watt LED grow light should be raised to 24-36 above the canopy.
