African American Children And Mental

African American Children and Mental Health, by Nancy E. Hill, Tammy L. Mann, Hiram E. Fitzgerald, Editors. African American children are at the highest risk for becoming school dropouts, for academic disengagement and failure, and for under- or unemployment. The fundamental issue facing their mental health is educational readiness and academic adjustment, but they also face a higher incidence of health problems including hypertension, and one in three African American children lives in poverty.
