Capitalism Is the Key to Fixing Climate Change - Reason.com

So, capitalism is beginning to step in, doing what it does best: aligning markets and prices with risks and opportunities — in this case, those associated with climate change. The financial sector, from banks to insurers, is finding itself on the firing line of this movement.

Capitalism's change of climate | Greenbiz

Climate change is a feature, not a bug of capitalism. To avoid catastrophic climate change, we have to break the expansionary cycle of the economy. Otherwise technological improvements, renewable energy, and energy efficiency gains will do nothing but add to the stock of ways that capitalists grow the economy and their profits.

'System Change Not Climate Change': Capitalism And ...

In order to prevent a climate change disaster, free market capitalism must give way to a new eco-fiscal reality that privileges the planet over profits. Defenders of capitalism think the opposite is true: while capitalism has contributed to climate change, it is also uniquely positioned to solve it.

Climate Change and Capitalism | Munk Debates

Emphasize that capitalist modes of production require large scale burning of fossil fuels to meet energy requirements, and these in turn contribute towards global warming. Thus, discuss how the capitalist model can be modified for a sustainable future: preservation of natural resources and mitigating climate change.
