The Basic Chemistry of Acids and Bases. A lot of chemistry requires you to understand the difference between acids and bases. An acid is a substance that donates an  $H^+$  ion to another chemical species called a base. A base is a substance that accepts (combines with) an  $H^+$  ion.. If you need to know the concentration of the  $H^+$  ion in solution, you can do so by representing the  $H^+$  molarity,  $[H^+]$ .
