Fire Pump Controller and Product Manuals | Tornatech

The Jockey pump is fitted with a pressure switch, which will cut in a cut off time. The jockey pump won't start unless there is a leak and the pressure in the pipe line decrease. While the pressure decreases, the cut in pressure is reached and the motor starts. When the required pressure reaches the cut off pressure, then the motor stops.

What is a Jockey Pump? (with pictures) - wiseGEEK

A jockey pump is a small pump connected to a fire sprinkler system to maintain pressure in the sprinkler pipes. This is to ensure that if a fire-sprinkler is activated, there will be a pressure drop, which will be sensed by the fire pumps automatic controller, which will cause the fire pump to start.
