Blockchain Revolution. by Don Tapscott & Alex Tapscott. Over 30 years, no theorist of the digital age has better explained the next big thing than Don Tapscott. For example, in Wikinomics Tapscott was the first to show how the Internet provides the first global platform for mass collaboration. Now, he writes about a profound technological shift that will change how the world does business—and everything else—using blockchain technology, which powers the digital currency Bitcoin.

Blockchain Revolution

Blockchain represents nothing less than the second era of the internet - an evolution from a platform for communicating information to a platform for transacting value. Using cryptography, collaboration, and some clever code, blockchain allows us to securely transact anything of value, from money and stocks to data, art, votes, and more.

Blockchain Revolution Global

Blockchain analysis. The analysis of public blockchains has become increasingly important with the popularity of bitcoin, Ethereum, litecoin and other cryptocurrencies. A blockchain, if it is public, provides anyone who wants access to observe and analyse the chain data, given one has the know-how.
