The Rion Antirion Bridge Dr

The Rio-Antirrio Bridge, officially the Charilaos Trikoupis Bridge, is one of the world's longest multi-span cable-stayed bridges and longest of the fully suspended type. It crosses the Gulf of Corinth near Patras, linking the town of Rio on the Peloponnese peninsula to Antirrio on mainland Greece by road. It opened one day before the Athens 2004 Summer Olympics, on 12 August 2004, and was used to transport the Olympic Flame.

Rio-Antirrio Bridge - Wikipedia

The Rion-Antirion Bridge is considered to be a creation of extraordinary engineering. Built in an area with high seismicity, it spans a 3 km-wide straight across the Gulf of Corinth, northeast of the city of Patras on Peloponnesus, Greece, and links the town of Rion on Peloponnesus with the town of Antirion on the Greek mainland, approximately 250 km northwest of Athens, Greece.

RION-ANTIRION BRIDGE - An Engineering Marvel - Dr. Carolyn ...

The bridge crosses the Gulf of Corinth at a narrow point connecting the Peloponnese with Mainland Greece. It was the most expensive toll bridge that I have ever crossed, but I guess that is all right for a once in a lifetime experience. Read more.

Rion-Antirion Cable-Stayed Bridge, Gulf of Corinth, Greece

With a suspended deck of 2,252m, the Rion-Antirion Bridge features four pylons (where there are usually two) and has a reference span of 560m. Located in the western end of the Gulf of Corinth in Greece, the Rion-Antirion Bridge links the Peloponnese (southern Greece) to the Greek mainland.

THE RION ANTIRION BRIDGE - www.sy8.nl

Rion-Antirion Bridge. Linking the Peloponnese to mainland Greece via the Strait of Corinth was a dream that many projects failed to achieve until the construction of the Charilaos Trikoupis (Rion-Antirion) cable-stayed bridge, a major technical achievement. Unique technical means were leveraged to create a span, 2,883 metres long, that would withstand extreme conditions.
