Rivers That Flow North THE FACTS: Unless the land it totally flat, rivers of water run downhill. A large percentage of the planet's river flow in a southerly direction because the source (usually in the mountains) is to the north of the mouth. If the source of a river is at a higher elevation than the mouth, that river will run from the source to the mouth.

The River Flows North. by. Graciela Limón. 3.62 · Rating details · 50 ratings · 5 reviews. "There is a pathway traveled by migrants that cuts away from the Mexican border as it slithers north through the Arizona desert up to Interstate 8. Migrants know this highway as la Ocho, the road that takes them to a better life, but the trail that leads to that highway is ruthless and unforgiving."
